## PROFESSIONAL SUMMARY

**MSc Artificial Intelligence student** and **Full-Stack Developer** with a proven track record of building scalable, maintainable, and data-driven solutions. Experienced in the entire development life cyclefrom problem analysis and ML model development to deployment and system integration. Committed to clean architecture and engineering best practices aligned with European industry standards. Actively seeking a working student or entry-level role in AI/ML or Software Engineering to apply advanced analytical skills to real-world challenges.

## EDUCATION

**Berlin School of Business and Innovation (BSBI)** — Oct. 2025 – Present — Berlin, Germany
*Masters of Science in Artificial Intelligence*

**University of Gujrat** — Sep. 2019 – Sep. 2023 — Gujrat, Pakistan
*Bachelor of Science in Computer Science*

## EXPERIENCE

**Rayan Pak Corporation** — Jan. 2024 – Aug. 2025 — Sialkot, Pakistan
*Full-Stack Software Engineer & IT Lead*

– Architected and maintained the companys enterprise platforms using the MERN stack, integrating AI-driven analytics to improve business decision-making by 20%.
– Developed an automated reporting system using HTML, JavaScript, and CSS to visualize real-time test results, streamlining internal communication.
– Directed the end-to-end SDLC for custom software and B2B platforms, ensuring high attention to code quality, security, and performance.
– Led technical onboarding for B2B clients, bridging the gap between complex technical implementations and strategic business requirements.

## PROJECTS

**Full-Stack MERN Application** | *MongoDB, Express, React, Node, JWT* | Link
– Built a secure authentication system using JWT for role-based authorization and session management.
– Developed RESTful APIs to handle complex CRUD operations with a responsive React.js frontend interface.

**Firebase Auth & CRUD** | *Flutter, Firebase Firestore, Cloud Auth* | Link
– Implemented robust authentication (Email/Password, Phone) and real-time data synchronization using Firestore.
– Optimized app performance through efficient data retrieval and state management in Flutter.

**International News App** | *Flutter, RESTful API, JSON Parsing* | Link
– Integrated third-party RESTful APIs to deliver real-time news data with offline bookmarking capabilities.
– Designed an interactive UI featuring navigation drawers and optimized search functionality for seamless UX.

## SKILLS

**AI & Machine Learning** : Model Development, Optimization, Predictive Analytics, Python (NumPy, Pandas)
**Software Engineering** : Clean Architecture, OOP, RESTful APIs, System Integration, Git, Agile
**Full-Stack Development** : MERN Stack (MongoDB, Express, React, Node), Java, C++, Flutter, Firebase
**Web & Mobile** : HTML/CSS, JavaScript, Android Studio (Java), Cross-Platform Mobile Development
**Spoken Languages** : English : Fluent (C1), German : Basic (A2 - Actively Learning B1)

## CERTIFICATIONS

**MERN Stack Developer** — Jan. 2025
*NexusBerry Training & Solutions*

**Mobile Application Development** — Feb. 2024
*E-Rozgar (Specialization: Firebase, Mobile Applications)*

**Mobile Application Development** — Dec. 2023
*Eziline Software House Pvt Ltd (Specialization: Flutter, Mobile Applications)*

**The MERN Stack Full Guide (React, NodeJS, Express & MongoDB)** — Dec. 2023
*Udemy*
